

TIMELINE

THE RUNWAY

PLAN

DONE

We think we've got this down, and it's all available here <https://KoopzyIO.com/>

PROTOTYPE

DOING

We knew the exact tech stack before starting, and are standing up a MVP demo.

Q3 FINANCE

DOING

A \$19K seed raise to setup corporate structure, finance the prototype, and explore the best financing obligations for the cooperative.

Q3-Q4 BUILD

An intensive engineering blitz to finish a working MVP. This part is really amazing to watch!

Q1 2025 LAUNCH

Free, soft launch to members. We've spent the year building relationships with others co-ops and members. It's rubber meets the road time!

OPERATE

We're putting all our operating principles to the test by using Koopzy in a live, test lab cooperative in Brooklyn, NY. (owned and managed by Koopzy members)

EXPAND

After spending several weeks of testing and launching features, we'll start expansion through meaningful partnerships, and availability in both Apple and Google Play stores.

Koopzy cooperative members pay only \$1 per year
No personal credit checks or founder guarantee needed.
